NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the accounting period ended September 30, 2026

Unit: VND

1 GENERAL INFORMATION

Vietnam Sun Corporation ("the Company") is a shareholding company incorporated under the Law on Enterprise of Vietnam pursuant to the Enterprise Registration Certificate No. 4103001723 issued by the Department of Planning and Investment of Ho Chi Minh City on 17 July 2003, as amended.

The Company's shares were listed on the Ho Chi Minh Stock Exchange ("HOSE") with the Decision No. 81/QD-SGDHCM dated by the HOSE on 23 July 2008.

The current principal activities of the Company are to provide taxi transportation services and contractual passenger transport; to render inbound and outbound tourism services; to act as air ticket agent; and to lease out spaces.

The Company's registered head office is located at No. 648, Nguyen Trai Street, Cho Lon Ward, Ho Chi Minh City, Vietnam.

The number of employees of the Group as of September 30, 2026 is 1.120 (December 31, 2025: 1.407).

CORPORATE STRUCTURE

The Company has one (1) subsidiary, which is consolidated into the Company's consolidated financial statements at the end of the fiscal year, as follows:

Vinasun Green Joint Stock Company ("ADX") is a shareholding company incorporated under Enterprise Registration Certificate ("ERC") No. 0401378832 issued by the Department of Planning and Investment of Da Nang City on 10 September 2010, and subsequent amended certificates. The registered head office of ADX is located at No. 277, Nguyen Huu Tho Street, Ward Hoa Cuong Bac, District Hai Chau, Da Nang City, Vietnam. The principal activity of ADX during the current period is the provision of taxi transportation services. As at September 30, 2025, the Company holds a 99% ownership interest in this subsidiary.

2 BASIS OF PREPARATION

2.1 Accounting standards and system

The individual financial statements of the Company, expressed in Vietnam dong ("VND"), are prepared in accordance with the Vietnamese Accounting System, Vietnamese Accounting Standard No. 27 – Financial Statements at the End of the Reporting Period, and other Vietnamese Accounting Standards ("VAS") issued by the Ministry of Finance as per the

- Decision No. 149/2001/QD-BTC dated 31 December 2001 on the Issuance and Promulgation of Four Vietnamese Accounting Standards (Series 1).
- Decision No. 165/2002/QD-BTC dated 31 December 2002 on the Issuance and Promulgation of Six Vietnamese Accounting Standards (Series 2).
- Decision No. 234/2003/QD-BTC dated March 30, 2003 on the Issuance and Promulgation of Six Vietnamese Accounting Standards (Series 3).
- Decision No. 12/2005/QD-BTC dated February 15, 2005 on the Issuance and Promulgation of Six Vietnamese Accounting Standards (Series 4).
- Decision No. 100/2005/QD-BTC dated March 28, 2005 on the Issuance and Promulgation of Four Vietnamese Accounting Standards (Series 5).

Accordingly, the accompanying separate balance sheet at the end of the fiscal year, separate income statement at the end of the fiscal year, separate cash flow statement at the end of the fiscal year, and the accompanying notes to the separate financial statements have been presented, including their utilisation are not designed for those who are not informed about Vietnam's accounting principles, procedures and practices and furthermore are not intended to present the interim consolidated financial position and results of its interim consolidated operations and interim consolidated cash flows in accordance with accounting principles and practices generally accepted in countries other than Vietnam.

The Company is the parent company of a subsidiary, as disclosed in Note 16 to the separate financial statements as at the year-end. The Company is in the process of finalizing the consolidated financial statements of the Company and its subsidiary (the "Group") as of and for the accounting period ended September 30, 2026, to comply with current disclosure regulations.

Users should read these year-end separate financial statements together with the Group's consolidated financial statements as of and for the accounting period ended September 30, 2026, to obtain comprehensive and general information about the Group's consolidated financial position, consolidated operating results, and consolidated cash flows at the end of the fiscal year.

2.2 Applied accounting documentation system

The Company's applied accounting documentation system is the Voucher Journal system.

2.3 Fiscal year

The Group's fiscal year applicable for the preparation of its consolidated financial statements starts from 1 January and ends on December 31.

2.4 Accounting currency

The consolidated financial statements at the end of the fiscal year are prepared in VND, which is also the Company's accounting currency.

2.5 Basis of consolidation

The consolidated year-end financial statements comprise the year-end financial statements of the parent Company and its subsidiaries for the year ended September 30, 2025.

Subsidiaries are fully consolidated from the date of acquisition, being the date on which the Company obtains control of the subsidiary, and continued to be consolidated until the date that such control ceases.

The year-end financial statements of the Company and its subsidiaries used for consolidation are prepared for the same reporting period, applying consistent accounting policies.

All intra-company balances, income and expenses, and unrealised gains or losses result from intragroup transactions are eliminated in full.

Non-controlling interests represent the portion of profit or loss and net assets of the subsidiary not held by the Company, and are presented separately in the consolidated income statement at the end of the financial year and distinct from the equity of the parent company's shareholders in the equity section of the consolidated balance sheet at the end of the financial year.

3 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

3.1 Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, cash in banks, and short-term, highly liquid investments with an original maturity of less than three months that are readily convertible into known amounts of cash and that are subject to an insignificant risk of change in value.

3.2 Inventories

Inventories are recognized at the lower of cost or net realizable value. The cost is determined based on the current conditions and the net realizable value that can be realized.
The net realizable value is the estimated selling price of the inventory in the ordinary course of business, less the estimated costs to complete and sell the inventory.
The perpetual method is used to record inventories, which are valued as follows:

Tools and supplies - Cost of purchases on a weighted average basis

Provision for Obsolete Inventories

The allowance for inventory is created for the estimated loss arising from the impairment of value (through diminution, damage, obsolescence, etc.) of inventories owned by the Company, based on appropriate evidence of impairment available at the balance sheet date. Increases or decreases to the provision balance for inventory impairment are recorded into the cost of goods sold account in the period.

3.3 Receivables

Receivables are presented in the separate financial statements at the carrying amounts due from customers and other debtors, after deducting provisions for doubtful debts.
The allowance for doubtful accounts reflects the amounts of receivables that the Company expects to be uncollectible at the end of the accounting period. Increases or decreases to the provision balance are recorded as general and administrative expenses in the separate income statement for the period.

3.4 Tangible fixed assets

Tangible fixed assets are stated at cost less accumulated depreciation.
The cost of a tangible fixed asset comprises its purchase price and any directly attributable costs incurred in bringing the tangible fixed asset to working condition for its intended use.
Expenditures for the acquisition, improvement, and renewal of tangible fixed assets are recorded as an increase in the original cost of the assets, while maintenance and repair expenses are accounted for in the separate financial performance results at the end of the fiscal year as incurred.
When tangible fixed assets are sold or disposed of, the carrying amount and accumulated depreciation are removed, and any gain or loss resulting from the disposal is included in the separate operating results at the end of the fiscal year.

3.5 Leased Assets

The determination of whether an arrangement is, or contains, a lease is based on the substance of the arrangement at the inception date and requires an assessment of whether the fulfillment of the arrangement is dependent on the use of a specific asset and the arrangement conveys a right to use the asset.
A lease is classified as a finance lease whenever the terms of the lease transfer substantially all the risks and rewards of

Assets held under finance leases are capitalised in the separate balance sheet as at the year-end at the inception of the lease at the fair value of the leased assets or, if lower, at the net present value of the minimum lease payments. The principal amount included in future lease payments under finance leases are recorded as a liability. The interest amounts included in lease payments are charged to the interim consolidated income statement over the lease term to achieve a constant rate on interest on the remaining balance of the finance lease liability.

Capitalised financial leased assets are depreciated using straight-line basis over the shorter of the estimated useful lives of the asset and the lease term, if there is no reasonable certainty that the Group will obtain ownership by the end of the lease term.

Rentals under operating leases are charged to the consolidated income statement on a straight-line basis over the lease term.

3.6 Intangible Fixed Assets

Intangible fixed assets are stated at cost less accumulated amortization.

An intangible fixed asset comprises its purchase price and any directly attributable costs of preparing the intangible fixed asset for its intended use.

Expenditures for upgrades and renewals of intangible assets are added to the carrying amount of the asset, and other expenditures are charged to the separate operating results at the end of the fiscal year as incurred.

When intangible assets are sold or retired, the carrying amount and accumulated depreciation are written off, and any

3.7 Depreciation and Amortisation

Depreciation of tangible fixed assets, depreciation of finance leased assets, and amortization of intangible fixed assets are calculated on a straight-line basis over the estimated useful life of each asset as follows:

Machinery and equipment: 3-7 years

Means of transportation: 6-10 years

Office equipment: 3-7 years

Computer software: 3 years

3.8 Investment properties

Investment properties are stated at cost, including transaction costs, less accumulated depreciation and/or amortisation.

Subsequent expenditure relating to an investment property that has already been recognised is added to the carrying amount of the investment property when it is probable that future economic benefits, in excess of the originally assessed standard of performance of the existing investment property, will flow to the Company

Investment properties are derecognised when they have either been disposed of or are permanently withdrawn from use and no future economic benefits are expected from their disposal. The difference between the net disposal proceeds and the carrying amount of the assets is recognised in the separate income statement in the year of retirement or disposal.

Transfers are made to investment properties when, and only when, there is a change in use, evidenced by the ending of owner-occupation, the commencement of an operating lease to another party, or the ending of construction or development. Transfers are made from investment properties when, and only when, there is a change in use, evidenced by the commencement of owner-occupation or the commencement of development with a view to sale. The transfer from investment property to owner-occupied property or inventories does not change the cost or carrying amount of the property for subsequent accounting at the date of the change in use.

3.9 Borrowing Costs

Borrowing costs consist of interest and other costs that arise directly in connection with the Group's borrowings and are recorded as expenses in the period in which they are incurred.

3.10 Prepaid Expenses

Prepaid expenses are reported as short-term or long-term prepaid expenses on the separate balance sheet at the end of the financial year and are allocated over the period for which the corresponding expenses are paid, in relation to the economic benefits generated from these expenses.

3.11 Other long-term investments

Other long-term investments are recorded at actual purchase cost. Provisions are made for any decline in the value of marketable investments as at the end of the respective accounting period, based on the difference between the historical cost of the securities and their market value at that date, in accordance with the guidelines stipulated in Circular No. 228/2009/TT-BTC issued by the Ministry of Finance on 07 March 2009. Increases or decreases in the provision balance are recognized as financial expenses during the period in the separate income statement as at the year-end.

3.12 Payables and Accruals

Payables and accruals are recognised for amounts to be paid in the future for goods and services received, whether or not billed to the Group.

3.13 Foreign Currency Transactions

Transactions arising in currencies other than the Group's reporting currency of (VND) are recorded at the actual transaction exchange rates on the date of the transaction. At the end of the accounting period, monetary items denominated in foreign currencies are revalued at the buying exchange rates of the commercial bank where the Group has its accounts at that time. All actual exchange rate differences arising during the period and differences from the revaluation of foreign currency monetary balances at the end of the period are recorded in the separate income statement at the end of the fiscal year.

3.14 Profit distribution

Net profit after tax is available for appropriation to shareholders after approval in the annual general meeting, and after making appropriation to reserve funds in accordance with the Company's Charter and Vietnam's regulatory requirements. The Group appropriates funds to reserves as proposed by the Board of Directors and approved by the shareholders at the Annual General Meeting of Shareholders:

- Financial reserve fund

  This reserve is established to safeguard the Group's normal business operations against risks or business losses, or to provide for unexpected losses or damages arising from objective factors or force majeure events such as fire, instability in domestic or international economic and financial conditions.

- Investment and development fund

  This fund is set aside for use in the Company's expansion of its operations or for in-depth investment.

- Bonus and welfare fund

  This fund is set aside for the purpose of pecuniary rewarding and encouraging, common benefits and improvement of the employees' benefits.

3.15 Earnings per share

Basic earnings per share amount is computed by dividing net profit for the year attributable to ordinary equity holders of the Company (after adjusting for the bonus and welfare fund) by the weighted average number of ordinary shares outstanding during the the year.

Diluted earnings per share amounts are calculated by dividing the net profit after tax attributable to ordinary equity holders of the Company (after adjusting for interest on the convertible preference shares) by the weighted average number of ordinary shares outstanding during the year plus the weighted average number of ordinary shares that would be issued on conversion of all the dilutive potential ordinary shares into ordinary shares.

3.16 Revenue Recognition

Revenue is recognized when the Group is likely to receive economic benefits that can be reliably determined. Revenue is measured at the fair value of amounts received or receivable after deducting trade discounts, sales allowances, and sales returns. The following specific recognition criteria must also be met when recognizing revenue:

Rendering of Services

Revenue is recognized upon the completion of the services provided.

Interest Income

Revenue is recognized as the interest accrues (taking into account the effective yield on the asset) unless collectability is in doubt.

3.17 Other income

This indicator reflects other income generated during the reporting period. The data for this indicator is derived from the total debit entries of Account 711 - "Other Income," offset by credit entries in Account 911 - "Determination of Business Results" during the reporting period.

Specifically, for transactions involving the liquidation or disposal of fixed assets and investment real estate, the data for this indicator represents the difference between the proceeds from the liquidation or disposal exceeding the net book value of the fixed assets and investment real estate, minus any liquidation costs.

When a superior unit compiles a consolidated report with subordinate units lacking legal personality, any other income arising from internal transactions must be excluded.

3.18 Other expenses

This indicator represents the total of other expenses incurred during the reporting period. The data for this indicator is derived from the total amount credited to Account 811 - "Other Expenses," corresponding to the debit side of Account 911 - "Determination of Business Results" during the reporting period.

Specifically, for liquidation and sale transactions of fixed assets and investment properties, the data for this indicator reflects the difference between the proceeds from the liquidation or sale of fixed assets and investment properties that is less than the remaining value of the fixed assets and investment properties, along with the liquidation costs.

When the superior unit prepares a consolidated report with subordinate units lacking legal status, any other income arising from internal transactions must be excluded.

3.19 Taxation

Current Income Tax

Current income tax assets and liabilities for the current period and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities, calculated using the tax rates and tax laws in effect as of the end of the accounting period.

Current income tax is charged or credited to the separate income statement for the financial year, except when it relates to items recognized directly in equity, in which case the current income tax is also dealt with in equity.

Current income tax assets and liabilities are offset when there is a legally enforceable right for the Company's to set off current tax assets against current tax liabilities and when the Company's intends to settle its current tax assets and liabilities on a net basis.

Deferred Tax

Deferred tax is provided using the liability method on temporary differences at the end of the accounting period between the tax bases of assets and liabilities and their carrying amounts for the purpose of preparing separate financial statements.

Deferred tax liabilities are recognized for all taxable temporary differences. Deferred tax assets are recognized for all deductible temporary differences, unused tax credits, and unused tax losses, to the extent that it is probable that future taxable profits will be available against which these deductible temporary differences, carried forward unused tax credits, and unused tax losses can be utilized.

The carrying amount of deferred tax assets is reviewed at each accounting period end and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized. Previously unrecognized deferred tax assets are reassessed at each accounting period end and recognized to the extent that it has become probable that future taxable profit will allow the deferred tax assets to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on tax rates and tax laws that are enacted at the end of the accounting period.

Deferred tax is charged or credited to the separate financial statements the end of the fiscal year, except when it relates to items recognized directly in equity, in which case the deferred tax is also recognized directly in the equity account.

The company is permitted to offset deferred tax assets and liabilities only when it has the legal right to offset current tax assets against current tax liabilities, and when these deferred tax assets and liabilities pertain to corporate income tax administered by the same tax authority for the same taxable entity. Alternatively, this is allowed when the company intends to settle current tax liabilities and assets on a net basis or recover assets simultaneously with the settlement of liabilities in each future period where significant amounts of deferred tax liabilities or assets are settled or recovered.

30 CORPORATE INCOME TAX

The statutory rate applicable to the Company and its subsidiaries is 20% of taxable income

The Company's tax returns are subject to examination by the tax authorities. As the application of tax laws and regulations to different transactions may be interpreted in various ways, the tax amounts reported in the separate financial statements during the interim period could be subject to change based on the final determination by the tax authorities

30.1 CIT expense

	For the accounting period ending on September 30, 2026	For the accounting period ending on September 30, 2025
Current CIT expense	-	7,546,502,077
Adjustment for corporate income tax from prior year	-	-
Deferred tax expense	1,156,165,564	-
TOTAL	**1,156,165,564**	**7,546,502,077**

30.2 Current corporate income tax

The current corporate income tax payable is determined based on taxable profit for the current period. The taxable profit of the Company differs from the profit reported in the separate income statement at year-end because taxable profit excludes items of income or expense that are taxable or deductible for tax purposes in other periods, and it also excludes items that are not taxable or not deductible. The Company's current corporate income tax payable is calculated

Below is a comparison of pre-tax profit and taxable profit:

	For the accounting period ending on September 30, 2026	For the accounting period ending on September 30, 2025
Accounting profit before tax and estimated taxable profit	(67,666,360,460)	40,898,223,873
Non-deductible expenses	-	-
Interest transferred to the next period according to Decree 132		
Changes to severance reserve, driver bonuses, and gifts	(124,063,380)	(83,395,200)
Adjusted profit before tax prior to offsetting with prior years' losses	**(67,790,423,840)**	**40,814,828,673**
Prior years' losses carried forward	-	
Estimated taxable profit for the current year	**(67,790,423,840)**	**40,814,828,673**
Cumulative loss carried forward to subsequent years		-
Adjustment of Previous year's CIT	-	-
At CIT rate of 20% applicable to the Company	**(13,533,272,092)**	**8,179,644,775**
Adjustment:		
Non-deductible tax expenses	-	-

Deferred income tax is not recognized for temporary differences.

	(24,812,676)	**(16,679,040)**
Deferred Income Tax Recognised in the Previous Period	**1,156,165,564**	-
Tax Losses Available for Offset Against Future Taxable	**13,558,084,768**	**(8,162,965,735)**
Estimated CIT Payable	-	**7,546,502,077**
CIT payable at the beginning of the year	2,954,777,275	1,597,561,473
CIT paid during the year	(2,954,777,275)	(1,808,129,530)
CIT payable at the ending of the year	**1,156,165,564**	**7,335,934,020**

30.3 Deferred tax

The following are the deferred tax assets recognized by the Company, along with the movements during the reporting year and the previous year as follows:

	Consolidated balance sheet		Consolidated income statement	
	Ending balance	Beginning balance	Current year	Prior year
Provision for severance benefits	-	631,534,393	-	631,534,393
Prepaid transaction fees for Smart POS prepaid cards	-	300,631,171	-	300,631,171
Prepaid gift expenses	-	224,000,000	-	224,000,000
Total	-	1,156,165,564	-	1,156,165,564

30.4 Loss carried forward to subsequent years

The Group is permitted to carry forward tax losses to subsequent years to offset against taxable profits for a period of 05 consecutive years from the year following the year in which the losses are incurred. As at September 30, 2026, the Group had estimated accumulated tax losses totalling VND 105,561,369,775.

(December 31, 2025: VND 37,770,945,935), which can be used to offset against future taxable income. Details are as follows:

Vietnam Sun Corporation

Year incurred	Expiry year (carryforward period ends)	Tax losses as at September 30, 2026	Tax losses utilised up to September 30, 2026	Non-deductible tax losses	Tax losses not yet utilised as at September 30, 2026
